PROJECTS

Feastly | *React, Node.js, MongoDB, Tailwind CSS*

- Built a full-stack AI-powered restaurant recommendation web app, enabling users to discover trending dishes and personalized dining experiences.
- Utilized Tailwind CSS for responsive design, ensuring seamless UI/UX across all devices.
- Implemented advanced search and filtering logic with MongoDB aggregation pipelines, improving search speed and user satisfaction.

VocaBot | *Python Flask, React, Websockets, SpeechRecognition, NLTK*

- Built a voice-activated chatbot that listens to users, summarizes their spoken input, and helps schedule appointments.
- Used Python's SpeechRecognition to convert voice into text, and NLTK to extract key information like dates, times, and tasks.
- Flask handled backend logic to process summaries and manage a simple appointment calendar stored in a local database.

Portfolio Website | *React.js, Vite, Tailwind CSS, Framer Motion, EmailJS*

- Designed and developed a modern, responsive portfolio website to highlight professional achievements, using React.js, Vite, and Tailwind CSS for performance and design flexibility.
- Integrated Framer Motion to implement smooth animations and transitions, enhancing user engagement and visual appeal.
- Built an interactive contact form using EmailJS to enable seamless client communication without backend dependencies.
